How to make a butter squishy

You need

- the printed page (plain printer paper squishes best, card stock is too stiff)
- scissors
- clear tape (wide packing tape is easiest) or a glue stick for the tab
- stuffing: tissues, cotton balls or a plastic bag cut into small pieces

Steps

1. Print at 100% ("actual size") on plain printer paper.
2. Optional: cover the printed side with clear packing tape. It makes the squishy shiny and strong.
3. Cut on the gray line. Keep the gray glue tab.
4. Fold on every dashed line, with the picture on the outside.
5. Glue or tape the tab inside the edge of the bottom panel. Now you have a long tube.
6. Fold one end down and tape it shut all around.
7. Push the stuffing in through the open end, a little at a time.
8. Fold the last end down and tape it shut. Squish!

Grown-ups: please help younger children with the scissors.

Check off every butter you make on the Collect Them All page.

The bottom of every butter has its number, name and rarity stars.
