How to make a paper squishy

You need

- the printed page (plain printer paper squishes best)
- crayons, markers or colored pencils
- scissors
- clear tape (wide packing tape is easiest)
- stuffing: tissues, cotton balls or a plastic bag cut into small pieces

Steps

1. Print the page at 100% ("actual size") on plain printer paper.
2. Color the front and the back.
3. Optional: cover both sides with clear tape. It makes the squishy shiny and strong.
4. Cut out both pieces on the gray line.
5. Put them back to back, pictures facing out. The shapes match.
6. Tape all around the edge, leaving a small gap at the bottom.
7. Push the stuffing in through the gap, a little at a time.
8. Tape the gap shut. Squish!

Please help younger children with the scissors.

The back shows the number, name and stars: 1 common, 2 rare, 3 super rare.

These 6 come from our full sets, so the numbers are not 1 to 6.
